The life I love is making music with my friends

and I can't wait to get on the road again

On the road again, goin' places that I 've been

and I can't wait to get on the road again

with the best of friend, insisting that the world turning our way and our way

is on the road again. I just can't wait to get on the road again.

The life I love is making music with my friends

and I can't wait to get on the road again,
